

## **NORTHWESTERN MEMORIAL HOSPITAL**

### **Excellence attracts recognition.**

Only 33 academic medical centers in the nation have been recognized with Magnet status - and Northwestern Memorial Hospital (NMH) is one of them. Join the team at an organization recognized for excellence in nursing and commitment to the best in patient care. We currently seek an experienced RN to join our Infection Control, Prevention department. Sponsored by the Centers for Disease Control and Prevention, it is one of eight U.S. Prevention Epicenters of Excellence.

Primary objectives will be to reduce the risk of nosocomial infection and to ensure the safety and health of all personnel. Selected candidate will perform clinical, educational and research responsibilities in collaboration with and reporting to a designated NMH Administrator and department Medical Director.

### **REQUIRED**

- Bachelor's degree in Nursing, Medical Technology, Chemistry, Biology or Allied Health related field and 2-3 years recent clinical experience in the acute care setting
- Computer and working knowledge of statistical data analysis techniques
- Experience may be as a RN, Medical Technologist, Epidemiologist, and/or have an advanced degree in Public Health or related healthcare field
- Appropriate state licensure or advanced degree depending on professional clinical background

### **DESIRED**

- 1-2 years of infection control experience
- 2 years of post graduate study in a healthcare related field, epidemiology and/or public health
- Knowledge of regulatory standards as they relate to infection control and prevention.
- Certification in Infection Control from the Certification Board for Infection Control and Epidemiology
- Excellent verbal and written communication skills

Northwestern Memorial Hospital offers superior resources, education, growth opportunities, facilities, and benefits - including premier health insurance featuring our renowned physician network.
