

Infection Control Coordinator

For over five decades, Northwest Community Hospital has upheld its mission of providing outstanding healthcare services. Currently, we have an opportunity available for a full-time Infection Control Coordinator to join our team.

Reporting to the Director of Quality Measurement and Improvement, the Infection Control Coordinator will serve as a resource to the organization, providing expert knowledge in infection control principles and practice. The Infection Control Coordinator is responsible for the design and implementation of the infection control program, investigating infection outbreaks and implementing action plans. This individual collaborates with both regulatory agencies regarding reporting requirements, as well as with Employee Health.

This position requires a Bachelor's degree in Nursing, Epidemiology, or Medical Technology and a minimum of five years of experience in infection control. Completion of a surveillance course in infection control is required; certification in infection control is required within one year of hire.

We offer competitive salaries and comprehensive benefits. Visit our website at www.nch.org to learn more and for an online application. Northwest Community Hospital, 800 W. Central Rd., Arlington Heights, IL 60005.
